

ABOUT DESIGN RELATIONS

Design Relations is a London Based Agency helping brands to connect with Architects and Interior Designer.

At Design Relations, we work with brands who are not only being environmentally responsible though are actively making changes so they have less of an environmental impact.

CLIENT PROFILE : BEND GOODS

Bend Goods is a Los Angeles based design and manufacturing company. Their philosophy has always been to design pieces that are equally as beautiful as they are functional.

All of their designs are hand bent and spot welded using recyclable metals before being electroplated or powder coated with durable and eco-friendly materials.

INDOOR & OUTDOOR

All powder coated pieces from the collection are suitable for both indoor and outdoor environments. Galvanisation of all materials before finishes are applied helps fight corrosion for added durability and longevity.

COMMERCIAL GRADE

Their contract grade and BIFMA tested products are versatile enough to fit into any interior or exterior setting. From a residential backyard to a five-star restaurant, Bend pieces can blend seamlessly into the most modern and/or distinctly traditional of spaces

NEW CLIENT : METHOD RECYCLING

Method are the makers of visible, flexible and beautiful recycling bins, designed for modern workplaces. They believe that better work place habits create a better world.

It is time for a new Method – a visible, beautiful, and effective system of change.

REVOLUTIONISED OFFICE RECYCLING

Their adaptable recycling stations move and grow as your needs change. Reimagined waste stream colours that complement your aesthetic, while meeting industry requirements.

Three years of research, design and development, their award-winning bin is changing modern workplaces.

SUSTAINABILITY SOLUTIONS

The world's most influential businesses are diverting more waste from landfill with Method.

They have been the long-term sustainability solution for Wellington Airport, Xero, Canva, Sydney Cricket Ground, and many more.
